Software Developers (All Levels) Oakville, ON

Description:

Pelmorex / The Weather Network /MeteoMedia is a highly computerized and automated organization that is rapidly expanding its scope in the marketplace. You will work within the Technology Development area to develop in-house business and consumer applications that address current and anticipated business needs.

The Software Developer will work with various team members such as the Project Leaders, Software Developers, Meteorologists, Network Operations, Broadcast, TV and Web teams. The main role will be to identify, specify, develop and maintain applications which meet the needs of Pelmorex.

As a Software Developer, you will have a chance to work within the following exciting areas:

- Wireless (SMS & Smart Phone applications)
- Database, XML and Web development
- 24/7 data processing and server applications/systems
- Desktop Applications / Backend services development.
- Web Services
- Email Engines
- Geographical Information Systems (ESRI/ Google / Microsoft Live Maps based products)

Responsibilities:

- Create scalable consumer applications which are distributed, Client/Server, Multi-tier, etc.
- Create applications with professional, effective and standardized interfaces for in-house and external consumer needs.
- Work with internal clients and project leaders to continuously analyze in-house software systems, identify weaknesses, and propose changes for improvement.
