Senior QA Developer

*Reports to: QA Manager
Oakville, ON*

The Weather Network has a proven track record of delivering high quality products to its customer base; in order to continue with that success, we are seeking a Senior QA Developer. The incumbent will independently perform testing tasks which require analysis, planning, scheduling, and testing to ensure that developed products meet design specifications and are within total quality management limits and standards. The Senior QA Developer may also assist product developers and I.T. with installation problems and help review/isolate software defects.

The successful candidate is a QA Developer generalist who will provide testing efforts for back-end meteorological data systems, mission critical alerting systems as well as consumer facing products. The incumbent will also be required to document what has been tested and report on the results.

Responsibilities:

- Plan and design testing beginning at the Software Design Phase.
- Review product requirements and design from testing perspective.
- Establish test plan, test requirement matrix, test design/specification and test cases/charters.
- Test software builds, isolate bugs, and document and track them in the bug repository.
- Provide guidance and assistance to junior QA team members in the execution of their testing assignments, resolving issues.
- Work with other functional departments (Development, Operations, Marketing).
- Keep track of progress on QA projects and generate status reports on a regular basis.
- Aid in planning, implementing test strategies and system improvements.
- Look for opportunities to improve and automate testing.

Roles, responsibilities and duties may evolve and change over time.

Qualifications:

- Degree in Computer Science, Computer Engineering or related discipline
- Minimum of 5 years of commercial software testing experience
- 1+ years experience with C++, C#, or .NET
- 1+ years experience with relational database

Competencies:

- Deep understanding of Windows OS, Linux
- Strong analytical and problem solving skills
- Strong multi-tasker, with the ability to set priorities under tight deadlines
- Positive, can-do attitude
- Creative thinking in approaching testing of the product
- Excellent communication and negotiation skills
- The successful candidate should be energetic and enthusiastic and able to work with flexibility in a highly dynamic environment
- Familiarity with Rapid Software Testing methodology would be considered an asset

Qualified applicants should submit their resume to: *Human Resources*, Fax: 905-829-1332 or email: hr@pelmorex.com. Please quote: “**Senior QA Developer**” in the subject line. Pelmorex is committed to equity in the workplace. We thank all applicants for their interest, but only those selected for an interview will be contacted.
